

WAV-CSCP Calculations with Examples

Overview

We included over 100 calculations with examples to help you better understand these concepts. While the exam has only a few actual calculations, a number of questions require you to have a good understanding of the process. It's hard to correctly answer a question if you aren't familiar with the calculation process. This is why it's so important to spend time reviewing and understanding these calculations. We recommend that you become familiar with all of the calculations found on our list.

Calculations Examples Found in Book

	Calculation	Chapter
1.	Aggregate inventory management	19
2.	Available time	15
3.	Available-to-promise	13
4.	Average inventory	20
5.	Benefit-cost analysis	20
6.	Capacity versus load	15
7.	Carrying costs	19
8.	Cash-to-cash cycle time	20
9.	Chase strategy	11
10.	Communications channels	7
11.	Cost of goods sold	20
12.	Cost performance index	26
13.	Currency hedging	5
14.	Customer lifetime value	9
15.	Customer order cycle time	2
16.	Days of supply	20
17.	Days payable outstanding	20
18.	Days receivable outstanding	20
19.	Days sales outstanding	20
20.	Declared value	5
21.	Decoupling inventory	19
22.	Demonstrated capacity	15
23.	Discounted payback period	20
24.	Distribution requirements planning	14
25.	Duty drawback	5
26.	Earned value	26
27.	Earned value measurement	26

28.	Earnings before interest and taxes	20
29.	Economic order quantity	19
30.	Economic value added	20
31.	Efficiency	15
32.	Estimated average method	8
33.	Expected monetary value	22
34.	Exponential smoothing	8
35.	Fill rate	2
36.	First-in, first out	20
37.	Fixed costs	4
38.	Fixed order quantity	19
39.	Generic inventory turnover	20
40.	Holding costs	19
41.	Import duty	5
42.	Inventory turnover for commodity	20
43.	Inventory turnover for retail	20
44.	Inverted duties	5
45.	Landed costs	19
46.	Last-in, first out	20
47.	Level strategy	11
48.	Leverage ratio	20
49.	Line item fill rate	2
50.	Linear regression	8
51.	Line-haul costs	4
52.	Liquidity ratio	20
53.	Lot-for-lot	19
54.	Manufacturing inventory turnover	20
55.	Marginal analysis	21
56.	Material requirements planning	23
57.	Mean absolute deviation	8
58.	Monetary value fill rate	20
59.	Naïve forecasting	8
60.	Net impact expected monetary value	22
61.	Net present value	20
62.	Opportunity costs	19
63.	Order fill rate	2
64.	Order fulfillment cycle time	2
65.	Ordering costs	19
66.	Overhead costs	20
67.	Packaging density	4
68.	Perfect order fulfillment	2
69.	Periodic review system	19
70.	Planned value	26
71.	Price elasticity	21
72.	Profitability ratio	20
73.	Projected available balance	13
74.	Rated capacity	15
75.	Reduction in cost of goods sold impact	20
76.	Reorder point	19

77.	Return on assets	20
78.	Return on investment	20
79.	Return on supply chain fixed assets	20
80.	Return on working capital	20
81.	Risk pooling	19
82.	Risk rating	22
83.	Schedule performance index	26
84.	Schedule variance	26
85.	Seasonality	8
86.	Shipping density	4
87.	Simple average (risk)	22
88.	Simple moving average	8
89.	Simple regression	8
90.	Standard cost	20
91.	Supplier capability	20
92.	Supplier capacity	20
93.	Supplier performance index	20
94.	Supply chain management cost	20
95.	Supply chain revenue	20
96.	Total cost of ownership	17
97.	Unit fill rate	2
98.	Utilization	15
99.	Value density	4
100.	Value-added tax	5
101.	Variable line-haul costs	4
102.	Weighted average method (risk)	22
103.	Weighted moving average	8
